# MASON VALLEY'S

None of Its Stock Will Be Open to Salt Lake Public Subscription.

INSIDERS GET EVERY SHARE

BIG TREASURY AVAILABLE FOR DEVELOPMENT.

Ever since George E. Gunn went east to perfect the organization of the Mason Valley Mines company, a corporation that has been formed under the laws of Maine to take over the properties of the old Maion Valley Copper company, local operstors have been on the tip-toe of expect

ators have been on the tip-toe of expectancy for the day when there would be an offering of stock in the new company. They may all now console themselves as best they may, for there is going to be no stock offering to the public. Mr. Gunn, who was able to be at his office yesterday, said so, and he knows.

"The new company." said Mr. Gunn, "has been organized with a capital of 1. 100.000 shares, par \$1. Of this, 400.000 shares were set aside as a treasury asset, and the remaining 600,000 shares are to be divided pro rata among the shareholders of the original company. Of the treasury btock it was decided to seil 100,000 shares at \$1. I sold 75,000 shares in the east and had intended to let Sait Lakers have the pther 25,000 shares. Since my arrival, however, I have found that shareholders in the original company are averse, to the treatment of the said to the said the said to the sa

however, I have found that shareholders in the original company are averse to the stock going to the public, so it has been decided to let them take it up proata according to their present holdings at the price fixed.

"You may say that this \$100,600 starts the new company off without a penny of indebtedness; it owns outright its properties, and there is fully \$75,000 to be applied to the future development of the ground. In my judgment this is all that will be required to make the property a splendid mine. The lower Spragg tunnel has cut the ledge and a cross-cut which has gone through it for a distance of approximately thirty feet, now, has been in ore that will average, according to reports from the property, better than Stray Dog .. .60 .65 .56 .70

per cent copper."

Mr. Gunn states that no more stock in the company will be disposed of until such time as the character of permanent equipment and methods of treatment have been determined upon. He has no doubt but that a smelter of large capacity will be built by his company, but that is a matter that will be taken up later on. It will possibly be three or four months, Mr. Gunn states, before the permanent officers and directors of the new company are determined upon and elected. For that reason he did not give the names of the directorate selected for organization he directorate selected for organization

Since his return from the east Mr. Gunr has been confined to his apartments with an aggravated attack of la grippe, and while he is around and looking after business, he will not attempt a trip to the mines of the company for possibly two

# PRESIDENT SHARP HERE.

Chief Official of U. & Company Will Investigate Smelter Removal.

William G. Sharp, president of the United States Smelting, Refining & Mining company, came in from New York Sunday night and will likely spend a couple of weeks looking after the company's interests here before proceeding on to the mines and smelting works of the company.

# IN BINGHAM STANDARI

Manager P. J. Donohue spent Sunda at the properties of the Bingham Stand and Copper company. A second cross-cu in the Saginaw tunnel, he says, was jus in the Saginaw tunnel, he says, was just coming into the ore when he was underground, and a report was at the mine that a fine body of lead-silver ore was making its appearance in the company's new Sampson tunnel, on the opposite side of the hill from the Saginaw, but it was storming so hard that he did not go over to inspect it.

Every day, Mr. Donohue says, the mine is opening up better and bigger, and he considers that the future of the proposition is just as secure as is that of any mine in Bingham.

ALL MINING AND HIGH-GRADE INVESTMENT

STOCKS AND BONDS BOUGHT AND SOLD. M. S. Hanauer.

Trading Moderately Active.

The week's opening on 'change found the market inclined to softness and with trading only moderately active. During the two regular and open board calls a total of 65,557 shares of stock, with a selling value of \$57,055.60, changed hands. There appears to be a place for every share of Daly that is offered at \$2.50, while the price of Ontario holds at \$7.25. Most of the Tintic stocks were inclined to drag and consequently eased down a little, while South Columbus of Alta was lifted to 62c and closed strong at 60c. lifted to 62c and closed strong at 60c. Following is the list of final quotations and record of sales made during the day: | Forenoon. | Afternoon.

# MINING STOCK EXCHANGE. THIS COMPANY DOES BUSINESS

Annual Meeting of Bingham Central Handles Subjects of Interest to the Public.

MERGE WITH STANDARD CO.

IS DISCUSSED AND AGENT TO DOINGS ON EXCHANGE NEGOTIATE IS NAMED.

of being made.

The election and organization of the new board of directors resulted as follows: Samue! Newhouse, president: D. C. Jackling, vice president and general manager: W. M. Bradley, secretary: C. W. Whitiey, treasurer: James A. Pollock being the fifth director.

The company is considering a proposition to consolidate with the Blugham Standard Copper company, but negotiations have not reached a stage where anything concerning the details can be given. Samuel Newhouse, as president of the company, was authorized by the directors to proceed with negotiations and select whoever he chose to act with him in the matter. In the matter.

When questioned on the consolidation

or amalgamation of the two properties after the meeting, Mr. Newhouse declared that it was impossible for him to say that it was impossible for him to say how the matter would culminate previous to the working out of details that would, now that the Bingham Central meeting was over, be formally taken up ith representatives of the Standard compan.

This, of course, is the formal way of stating things when matters of moment are pending. It is generally known, however, that both sides have been figuring on the deal for some time past and, as level-headed men are in control of both propositions, it is safe to say that it will not be many days till an agreement will not be many days till an agreement will be reached and the deal closed. Combined, these properties will make one of the really big propositions of the district

CARISA IS IMPROVING.

New Ore Shoots Tapped on 200 and 300-Foot Levels.

About one carload of ore a day is still being rolled out of the Carisa company's property at Tintic, the bulk of it coming from various portions of the mine in the regular course of development. Within the past few days a new strike has been made on the 200 and another on the 200-foot level of the property. According to reports from the mine, there is every probability that these two new ore bodies will be found to extend all the way between the 200 and 300 level and that section of Ne.

Vada.

W. J. Craig, John T. Hodson and Alex. Colbath, jr., of the Federal-Ely company to the properties of the consideration of the outerhase of these notes was atom for the purchase of these notes was the crawling down of the crawling down of the crowling down of the convertible bonds, said to be from \$\frac{41}{2}\$ to 91. The property at Tintic, the bulk of it combines to the company to be opening up in a most satisfactory manner, and they brought back some fine looking samples of ore to emphasize their opinions. They declined to give any details for publication.

# PERFECT

mand. It's the kind we manufacture. Yes. And they are perfect in fit and style, too. Eyes tested free for glasses.

# RUSHMER

# SOME STRENGTH

LAPSED

At the annual meeting of the Bingham Central company, held yesterday, inspiring reports were filed by Manager D. C. Jackling and Treasurer C. W. Whitley. The financial report showed that the treasury contained 106,000 shares of stock and \$35,000 in cash, with all obligations against the company for the past year discharged. Manger Jackling's report covered the development of the mines to date in detail. Over 6,000 feet of work was done and ore of-various grades had been opened at different places in the mine. Several points in the property are being approached by the wielders of pick and drill in which Manager Jackling felt justified in saying important new disclosures were on the point of being made.

The election and organization of the Bingham Standard yesterday morning and a sale Standard yesterday morning and a sale of two was fined as \$1.02½. This was made as low at \$1.02½. This was made as low at \$1.02½. This was immediately followed by a bid of \$1.05 and when the day closed the stock had sold at \$1.20, most all of the transfers of the day being made at close to that figure. Ohio was broken down from \$4.90 to \$41.75. Naildriver was bid up to \$45.00 to the volume of these accumulations, which gave rise to complaints from commission houses and little promise of a growth of outside interest in the market sufficient to sustain a campaign for a rise in prices. The early strength centered largely in the westerday, as reported by McCornick & Co., amounted to \$67,000, as follows: Silver, lead, gold and copper ores, \$22,000; base bullion, \$45,000.

Seventeen cars of ore from Utah camps and one from Nevada were released by the Taylor & Brunton sampler yesterday.

## GRAIN AND PROVISIONS.

GRAIN AND PROVISIONS.

Chicago, Jan. 14.—A decline in the price of wheat at Liverpool weakened prices today in the local market, the May delivery closing at a net loss of 1/4c. Oats were up 18/2/1814. Provisions were 15 to 25c higher.

The grain situation at Minneapolis and Duluth swayed prices upon the local exchange during the greater part of the day. Early in the session prices here were firm because of the strength at Minneapolis and Duluth, where receipts of wheat were small, but when prices in the northwest declined, values here followed to a considerable extent. News of the day favored the bulls. The world's shipments showed a decline in exports from Russia compared with last year, while shipments scale. The brunt of the selling pressure fell upon the July delivery, which was sold by pit traders upon the theory that the growing crop will probably be damaged by coid weather. The principal demand came from shorts. The market closed easy, with prices near the lowest of the day. May opened 1/4 to 1/6 to 1/6 sold off to 76% and closed at 1/6 to 1/6 sold off to 76% and closed at 1/6 sold off to 1/6 and closed at 1/6 sold off to 1/6 and closed to tonight throughout the corn belt, and receiving houses here declared that more liberal receipts were expected. Commission houses were the principal sellers, while demand was scattered. The market closed easy. May opened unchanged

at 45%, sold off to 43½@43% and closed at 43%, a shade lower for the day.

Oats were firm and the trading at times to 100 kg/4c higher at 33% to 36% and held within that range, the closing being at 100 kg/4c higher at 33% to 36% and held within that range, the closing being at 100 kg/4c up at 36%.

Provisions opened easy on selling caused by a 5-cent decline in the price of live boying by packers and the market was strong for the remainder of the day. The market closed strong with May pork 25c higher: lard was up 15c and ribs 15c higher.

The leading futures ranged as follows: The leading futures ranged as follows:
